Introduction

Developed for roulette, the *Guderian Progression* throws off winnings like crazy. This manual is a supplement to the *Guderian Progression* Strategy manual. The purpose of this manual is to show you can work no more than one hour a day, five days a week, and clear \$10,000 a week in roulette profits!

The Two Roulette Decisions You Have to Make to Beat Roulette!

Beating the roulette game using *The Guderian Progression* consists of making just two decisions –

Where do you place each bet and

How much do you bet each time.

That's it. All you have to do to beat the game is come up with a superior way of determining where to bet and how much to bet and you will have a source of cash that is unending.

And, *The Guderian Progression* has unique solutions to both sides of playing and beating this game!

Would You Like Some Examples of What You Can Do With The Guderian Progression?

If you are very cautious you can take a starting bankroll of just \$125 and get started making more money than you ever have before!

I know this sounds crazy, but it is a documented fact –

You can start with a \$125 buy-in making 25-cent bets in an online casino. Play for just a few hours and you will win enough to start making \$2 bets online.

As a \$1 online bettor, you can easily pull in \$1131 an hour in pure profits.

And you can do this with great confidence because of this strategy is very consistent and very reliable.

Keep up your online play and you will quickly move up to making \$2 bets winning an average of \$2262 an hour! At this level, five hours a week of play will net you a cool \$11,310 a week in roulette profits!

If you prefer to play in a land-based casino you will probably start as a \$1 bettor, using a buy-in of \$500. As your profits build you will quickly work your way up. *

From \$1 bets you will move to making \$2 bets, then \$5 and finally \$10 base bets.

Playing in a land-based casino \$10 betting will net you \$2262 an hour. Now, just put in an hour a day of play for five days a week and you'll pull in \$11,310 a week in profits.

I want to assure you that these are real amounts being won by real players even as I am writing this.

* Most land-based casinos require at least \$5 bet to meet the minimum bet requirements. With the Guderian Progression you will wager at least \$3 with \$1 base bets. To meet the casino minimum bet requirements you can bet \$5 on either red or black.

This book will show you how to make at least \$10,000 a week playing roulette just one hour a day for five days a week.

How This Manual Will Help You

To understand how to use *The Guderian Progression*, you will need to read the manual and practice using the strategy.

The goal of this book is simple – to help you set up your own roulette money machine using The Guderian Progression to make at least \$10,000 every week playing no more than five hours a week.

We will also give you some options –

Like how to double your winnings by working two hours a day instead of just one.

Or how to easily move up to making \$25,000 a week.

It is all here is a carefully laid out step-by-step plan. Let's get started!

Hourly Winnings

One of the best features about the Guderian Progression is its reliability and predictability. While anything can happen over the next few roulette spins, as you play longer using the strategy, the results become more and more predictable.

After playing thousands of games in casinos as well as playing thousands of simulated games on computers, we determined that the hourly winnings were pretty much dependent on:

- a. **The speed of the game and**
- b. **The size of your bets.**

So long as you apply the strategy correctly, your hourly wins will fall within a narrow average, which is very predictable.

Assuming an average table speed of about 60 spins per hour for play in a land-based roulette game and 300 spins per hour for online play, the amount you can win per hour is strictly dependent on the size of your bets, which is determined by your bankroll.

This is very straightforward and simply means that if you play with black \$100 chips, you should expect to win more than a player betting with green \$25 chips. Likewise, the green chip player will average winning more than the red \$5 chip player.

Table 1 shows the relationship between hourly winnings and the level of bankroll used at a table averaging 60 and 300 bets per hour, the average rate of play for land-based and online games, respectively. **These illustrations are based on the actual results obtained in hundreds of games played in real casinos.**

While this table, as well as the ones which follow, show the amounts you can win over different time periods with different amounts "invested" in each game, **there is nothing hypothetical about *the Guderian Progression's* win rates. These amounts are based on actual casino games.**

The first column in the table shows the minimum bet needed for each level of bankroll. This table shows minimum wagers of 25-cents, 50-cents, \$1, \$2, \$3, \$5, \$8 and \$10 bets.

The column matches up the amount you will use for each game with the minimum bet. If you are a 25-cent bettor, you will need to buy in for at least \$125. A 50-cent bettor will use \$250, and so on.

The first amount next to the buy-in required for 25-cent betting is \$56, the amount you will average at 60 spins per hour at this level of play. Please note that you will not win this amount per hour every hour you play. If you have only winning games, you will win more. If you have a losing game, you will win less. This is an average. **The longer you play, the closer your results should be to this average.**

The Guderian Progression

Hourly Winnings at 60 and 300 Spins Per Hour (Typical Speeds of Land-based and Online Casinos)

Base Bet	Game Bankroll	Land-based (60 spins per hour)	Online (300 spins per hour)	Land-based Profits for 5 Hours Play	Online Profits for 5 Hours Play
25¢	\$125	\$56	\$282	\$280	\$1400
50 ¢	\$250	\$113	\$565	\$565	\$2825
\$1	\$500	\$226	\$1131	\$1,130	\$5650
\$2	\$1000	\$452	\$2262	\$2,260	\$11,300
\$3	\$1500	\$678	\$3393	\$3,390	\$16,965
\$5	\$2500	\$1131	\$5655	\$5,655	\$28,275
\$8	\$4000	\$1810	\$9048	NA*	NA
\$10	\$5000	\$2262	\$11310	NA	NA

* Most online casinos would not accommodate the higher bets required for \$8 and \$10 based bets.

Looking at the row for 25¢ minimum bets, the next column shows the hourly winnings for play at 300 spins per hour, the average speed for an online roulette game.

Looking at the last two columns it is easy to see the profit levels for five hours of play.

If you play online as a \$2 bettor, five hours of play will net you \$11,300 a week.

Time and Money

Tables 2 and 3 are set up to help you make a decision on how you want to accomplish the goal of making a set amount of money each week, every month, or any other time period you want to use.

Let's assume that you have practiced *the Guderian Progression* and have seen how effective it is, and now want to use it to supplement your income. These tables show some options on how you might decide to meet your goal.

**The Guderian Progression
Professional Version
Table 2. Winnings Based on Time Played and
Bankroll Used for Play in an Online Casino**

<i>Minimum Bet</i>	<i>25¢</i>	<i>50¢</i>	<i>\$1</i>	<i>\$2</i>	<i>\$3</i>	<i>\$5</i>
Game Bankroll	\$125	\$250	\$500	\$1000	\$1500	\$2500
Average Winnings Per Hour	\$282	\$565	\$1131	\$2262	\$3393	\$5655
10 Hours a Week	2820	5650	11310	22620	33930	56660
20 Hours a Week	5640	11300	22620	45240	67860	113320
30 Hours a Week	8460	16950	33930	67860	101790	169,980

The Guderian Progression Professional Version
Table 3. Winnings Based on Time Played and
Bankroll Used for Play in an Land-Based Casino

<i>Min Bet</i>	<i>\$1</i>	<i>\$2</i>	<i>\$3</i>	<i>\$5</i>	<i>\$8</i>	<i>\$10</i>
Game Bankroll	\$500	\$1000	\$1500	\$2500	\$4000	\$5000
Average Winnings Per Hour	\$226	\$452	\$678	\$1131	\$1810	\$2262
10 Hours a Week	2260	4520	6780	11310	18100	22620
20 Hours a Week	4520	9040	13560	22620	36200	45240
30 Hours a Week	6780	13560	20340	33930	54300	67860

You can easily determine the relationship between the size of your bets and your weekly earnings using these tables.

Let's assume that you prefer playing in a local casino. You decide to play making \$2 bets.

Table 3 shows you that if you play roulette 30 hours a week you will make \$13,560.

You probably don't want to spend that much time playing roulette. Looking at the same table, you see that making \$3 bets you will make \$13,560 for 20 hours play.

While this sounds better than playing for 20 hours, looking at the column for \$5 play, you can see that this offers a much better return for your time –

Twenty hours a week of making \$5 minimum wagers will bring in \$22,620 on the average.

Moving up to making \$8 bets is even better. At his level, 10 hours a week of play really pays off with \$18,100 in winnings.

Since online roulette is a much faster game, the hourly winnings are much higher than for comparable levels of play in a land-based casino.

Looking at Table 2, you can see that playing 30 hours a week, making 25-cent bets online will bring you \$8,460 a week for your efforts.

However, you probably won't want to play 30 hours a week online. That's why you will want to move up in play as quickly as possible.

Once you move up to making 50-cent minimum bets online, just 20 hours a week will make you over \$11,300 in net profits.

What Does It Take to Make \$25,000 a Week?

As we have seen, we need to look at different rates of play and betting levels in comparing online play and play in a land-based casino.

As we have seen making \$10,000 a week can easily be done by playing just five hours a week.

In a land-based casino, you will need to make \$5 base bets to be able to net \$11,310 for five hours play.

Online, if you are a \$1 bettor, then five hours of play is all that is required to clear \$11,310 in profits.

Let's move the yardstick up to making \$25,000 a week!

If your goal is to make \$25,000 it can be accomplished in different ways. Table 4 below shows the time requirement, at different levels of play, to win \$25,000 a week playing roulette in a land-based casino.

The Guderian Progression Professional Version

Table 4. Time Required to Win \$25,000 a Week in a Land-based Casino

<i>Minimum Bet</i>	<i>\$1</i>	<i>\$2</i>	<i>\$3</i>	<i>\$5</i>	<i>\$8</i>	<i>\$10</i>
Game Bankroll	\$500	\$1000	\$1500	\$2500	\$4000	\$5000
Average Winnings Per Hour	\$226	\$452	\$678	\$1131	\$1810	\$2262
Hours of Play to Make \$25,000 a Week	111	55	37	22	14	11

Table 5 below show the time required to win \$25,000 a week in an online casino.

The Guderian Progression Professional Version
Table 5. Time Required to Win \$25,000 a Week in an Online Casino

<i>Min Bet</i>	<i>25¢</i>	<i>50¢</i>	<i>\$1</i>	<i>\$2</i>	<i>\$3</i>	<i>\$5</i>
Game Bankroll	\$125	\$250	\$500	\$1000	\$1500	\$2500
Average Winnings Per Hour	\$282	\$565	\$1131	\$2262	\$3393	\$5655
Hours of Play to Make \$25,000 a Week	89	44	22	11	7.5	4.5

If you want to make \$25,000 a week it is far easier to do if you increase the size of your base bets. For instance, an \$8 bettor, playing in a land-based game can win \$25,000 a week in about 14 hours of play. As a \$5 bettor it would take 22 hours of play to win \$25,000.

In online play, the same relationship applies. Here a \$3 bettor can win \$25,000 a week with just 11 hours of play.

The key to winning \$25,000 a week is to start small and build your bankroll out of winnings. It may take several weeks to do this but it is far easier to win large amounts when you start with a larger bankroll and larger wagers.

Rules to Help You Keep Your Winnings

There is no question that if you use the *Guderian Progression* strategy you will generate wins. I have even given you the average wins per hour achieved in actual play. Does this mean you can relax? Unfortunately no. Even though there is no question that you will win using this system of play, there is still the issue of leaving the casino with your profits in hand.

One of our most important rules to help you leave a winner is the 90% Rule. This rule says very simply that if you are close to hitting a target profit or a daily profit, that sometimes 90% or so is close enough.

I recall very well an acquaintance of mine who had a monster roll at a craps table. When I walked up to the table, Joe was rolling the dice and playing with \$500 chips scattered all over the layout. By the time he sevens out, he was up over \$48,000. This is not bad considering he bought in less than an hour earlier for a grand. I strongly urged him to come with me and take a break. I reminded him how badly he needed this score and how good he would feel walking out with his winnings intact. He nodded and smiled and then gave some lame excuse about wanting to bet with just a couple more shooters.

I had more than made my nut for that day. In fact, catching the last ten minutes of his hot craps roll had put me way ahead. I decided to take a break in the coffee shop and try some of the coconut cream pie which was reputed to be the best in town.

I ran into another friend and talked for over an hour. When I came back out, Joe was still at the same table. I walked up and noticed his pitiful little pile of green chips. Joe gave me a lame look and continued to play. I saw him the next day and asked him how he ended up. "Tapped out," were his words. "You didn't drop the whole 50 grand did you?" I asked.

"It was only 48 thousand," he responded. "The reason I kept playing is because I wanted to hit 50 thousand."

As I walked away, I wondered to myself what in the hell is the difference between 48 thousand and 50 thousand when you are that much ahead?

I think 48 thousand should have been close enough, don't you?

Any time you are struggling to hit a target profit, are playing on a short time schedule or just start to hear that little nagging voice somewhere in the back of your skull telling you to watch out, you can remember Joe. He should have known that 48 grand was close enough. Don't ever get hung up on exact amounts. If you are trying to win \$50 and hit \$48, you can call it close enough and take a break. Remember that you will never go broke by taking a break early and walking off with your profits intact.

Whenever you are somewhere near your target profit for a game, you need to make some changes. Obviously you can just call the game over and quit. However, if the dealer has been busting at a high rate and the table is definitely player favorable, it makes no sense to quit. So you do the next best thing. You move into the conservative betting mode.

Living a Life of Ease

When you go to the casino, you need to remember that your one purpose is to win. You can drink, party, visit, flirt and relax on your own time after you have locked up your daily win. After becoming a proficient roulette player and increasing the size of your minimum wagers, you will be able to travel a good part of the year, courtesy of your favorite casinos. This may become an important part of your retirement plan. You can use your new skills at roulette to pay for your vacations and pocket a good deal of change as well.

You may consider becoming a full time pro. Before you make this step, I want you to think about it very carefully. Whereas playing several times a month and winning can bring you a great deal of pleasure, having to play every day to make your daily nut is very difficult.

Casinos can be glamorous and exciting if you don't have to be in one every day. On a daily basis, I can think of many things I had rather do than go through the repetitive grind of play needed to hit my daily win goal. Everyone is different. If you think you would like to turn pro, I suggest you take a two week vacation and spend at least ten of the days in a casino playing roulette four hours a day. If, after two weeks of this, you are still game for more, then maybe you have what it takes to become a full time player. If you are like me, you may have to settle for being a part time pro and playing less frequently.

I hope you find *The Guderian Progression* to be a lifetime source of income and satisfaction. I would like to hear about your experiences. You may email me in care of the publisher. I wish you the best in all of your life endeavors.
