## How We Selected the Best Online Casino

There are a lot of really good online casinos. My publisher, Silverthorne Publications shares the experiences of its customers with many of these casinos in several of their publications. There is no question that there are many online casinos where you can play with great confidence that you will be treated fairly.

However, in picking the best online casino I wanted a casino that excelled in many different aspects of being an online casino. Here are the criteria I weighed the heaviest in determining which casino should be voted Number One:

1. The games must offer excellent odds. Our winner offers games with paybacks close to 100%.
2. The casino must offer the chance to try their games in practice mode in a no-hassle and user friendly manner. This casino bends over backwards to make playing in practice mode very easy – you don't even have to register or download any software – just click and start playing!
3. The casino must offer outstanding customer support. Have you ever had the experience of calling for customer support and then waiting for a long time to talk to a human being, only to find out the support tech doesn't know much more about solving the problem than you do and doesn't even speak a brand of English that you understand? Our online pick does all of its support in-house and uses well trained knowledgeable persons that will do their best to help you.
4. The casino must still accept US players. US anti-online gaming laws have scared off a number of online casinos. Not our pick. You can play here and live in the US.

5. The casino must offer a realistic bonus. Too many casinos put so many conditions on earning a bonus that very few players ever earn them. How about a straightforward 10% bonus that you can earn with normal play? Our pick offers that.
6. We feel that our number one pick should offer more than casino games. You should be able to participate in sports betting and in a poker room. And, you should be able to do it from one account and have all of your play count towards earning the bonus. Our winner does all of this and does it well!
7. You should be able to pick up \$500 for playing there. Turns out you can in our number one pick. We'll tell you how.
8. The casino has to be one where we can play and win. To determine this we had our players try numerous of our top choice casinos systems in a number of online casinos. There was one casino that produced the highest and most consistent profits!

And the winner is –

Bovada Casino (Bodog for Canada). Turn the page and find out why.

Bovada/Bodog – The  
Absolute Best  
Casino!

## **Games With Excellent Odds**

Many online casinos offer games where the odds are a little on the stingy side. Not so with Bovada and Bodog. They offer some of the best odds available online.

As a result they probably end up making more than their competitors. By giving their customers a better break they are more likely to earn the long-term good will of them – much like the local casinos in Las Vegas that typically offer much better odds than the casinos on the Las Vegas Strip!

Let me give you some examples of Bovada's odds –

They offer some of the best baccarat games around. You will find Full-Pay Jacks or Better returning 99.54%. In addition there are six other video poker games paying over 99%.

Bovada offers [single-zero roulette](#) which has much better odds than the double-zero version of the game.

They also offer two variations of blackjack with a house edge under 0.2%.

If you are a poker fan, try their Pick'em Poker with a 99.95% payback rate

## No-Hassle Practice Games

I am a great believer in using practice games. There is no easier way to perfect your skills and to determine if you like playing in a particular online casino than to try it out for a “Free Ride.”

Unfortunately, too many of the online casinos go out of their way to try to grab some of your money as their price for getting to practice for free.

First you will have to download their software in order to play. If they do have a game you can play from your browser without a download you are usually asked to register an account before you can play. And, once you register, look out. They will start bombarding you with emails trying to get you to deposit real money.

[Click Here](#) to Instant Access to the Instant Play Games!

You'll have a much different experience with Bovada. You can play [practice games in your browser](#) with no download and no registration. You don't have to give them your email address. Just click one time and you can practice playing as long as you want without registering. You won't even be subjected to popups or any other types of advertising!

What's more, you can play as long as you want for free. The real-money games are available if you decide to play them, but you can take your time and practice as long as you like.

## **Great Customer Support**

Bovada/Bodog offers multiple ways to contact them, including email, by email entry form and by toll-free telephone. Nothing unusual so far – just minimally acceptable ways to get in touch.

However, here's where they shine. Many other online casinos outsource their support. Not only can it be difficult to get a response, but the process is slow and often handled by someone with little understanding of gambling or even English. Bovada doesn't outsource its support. It is handled in-house by a support staff that I have found to be knowledgeable and helpful.

Bovada's support is handled out of its headquarters in Vancouver, Canada. If our experiences are any indication, you will be pleased with the attention and response given to your questions or problems by Bovada's staff.

## Bovada Still Accepts US Players

Recent anti-online gambling legislation in the US has scared off many online casinos from accepting US players. Not so with [Bovada](#). US players can still open accounts with Bovada without any restrictions because of US residency.

It is nice to know that Bovada's management has not been intimidated by what some feel is a totally misguided attempt by land-based casinos and hungry politicians in the United States to punish online casinos because they offer legitimate competition to US casinos and are not subject to US taxing authorities.

Congrats to you guys!

Bovada or Bodog also accept players from all over the world. It is truly **a one-stop gambling experience!**

## Bovada Offers a Bonus That You Can Really Keep

Getting bonuses used to be one of the most profitable aspects of online gambling. However, many customers got to greedy. They would register multiple times with the same casino, using different names to grab what was supposed to be a one-time sign up bonus.

Still other customers tried to manipulate requirements of play. Once many casinos started requiring that you play through your deposit a number of times, say ten times, before earning your bonus, many players would make opposite bets in craps or roulette and try to run up the dollars wagered without giving the casino any real action.

As a result, online casino bonuses are no longer handled in a straight forward manner by many casinos. While you'll get a popup box offering a bonus as soon as you visit a casino web site, finding the conditions required to earn the bonus is usually buried somewhere in the website and no at all easy to find.

Once you do find the bonus conditions, you will find that just about all games except slots are disallowed as counting towards earning the bonus.

Here's how Bovada handles its bonus –

[Bovada offers a 10% signup bonus](#) on your first deposit, whether your play in for their casino, sportsbook or poker rooms. As far as I can determine their in no limit on the size of the bonus. If you deposit \$5,000, you will get a bonus of \$500.

Here is how the bonus is earned:

## **Bovada's Bonus Playthrough Requirements**

Casino Games	Play deposit 15x to earn bonus
Sportsbook	Wager deposit one time to earn bonus
Poker	Must earn 3 poker points for each \$1 of bonus

The only casino games that don't count towards the wagering requirements to earn the bonus are Pontoon, Caribbean 21, and opposites bets (e.g. both red and black in roulette, or Pass Line and Don't Pass at craps).

Bovada's bonus is a "phantom bonus" meaning that if you attempt to withdraw it before you have met the playthrough requirement it disappears from your account.

This means that you can play blackjack, craps, roulette or baccarat and have all of your play count towards earning the bonus.

## Bovada Offers One Stop Shopping for Online Betting

Bovada is a full service online casino offering a casino as well as poker and [sports betting](#). Many other casinos have tacked on poker as an afterthought and it shows. On the other side of the coin, many poker rooms offer inferior online casinos. And few of these sites offer sports betting as well.

But Bovada not only offers all three, but it does each well and it is all integrated. You can play all three off of one deposit in one account.

**And, all of your wagering, subject to very few limitations (see my discussion of Bovada's bonus), counts towards earning your online bonus.**

## How to Make \$500 Free, Courtesy of Bovada

Because of Bovada's proven integrity you can be very confident that any money you deposit with them will be handled with the utmost care.

Here's an easy way to pick up \$500. Just deposit \$5,000 with Bovada and then [play blackjack](#) until you have given them enough action to earn the bonus. If you use the Blackjack Attack Strategy you will pick up some substantial winnings to which you can add the \$500 bonus.

This is a truly painless way of making another \$500.

## Bovada Is Your Best Choice for Online Gambling!

With the recent launch of an all–new 3D Slots gaming experience, [Bovada Casino](#) has truly become the best online casino for gamers anywhere. Players can test drive the new features by downloading the Casino software to take advantage of the full experience, or opt for a test drive by using the Instant Play feature.

**Bovada Casino has something for everybody, ranging anywhere from Table Games like Blackjack and Craps to dozens of unique Slots and Video Poker games. There’s no shortage of gaming options here, with something for every kind of player.**

The full downloadable Casino comes with the entire collection of games for play with practice and real money options, customizable features and best–in–class security.

The games at Bovada Casino are broken down into categories, including Table Games, Slots, Video Poker, Progressives and specialty games. Moreover, new games and special features are constantly being added to the site.

Table games include variations of Blackjack, Roulette, Baccarat, Craps and Rummy. Players will find dozens of different Slots available, each with a unique theme and betting line options. In terms of poker, players play against the house in any of several kinds of styles, including Jacks or Better, Deuces Wild and Joker Poker. Progressive games are variations of existing games where players can put some money into the jackpot and win it all by hitting the game’s highest payoff.

Each game has a built-in help menu and tutorial, so it's easy to jump in and get started. Some games, like many of the slots, have bonus mini-games where payouts multiply quickly for even larger wins. There's no rush to learn quickly or threats of slowing down others like there is at land-based casinos.

The software is constantly being updated with new games and features, so players will never get bored and players are always made aware of the most recent updates when they open the software. They can try new games using the play for real money options and, if they run out, they can add more immediately at no extra cost.

Bovada Casino has an impressive welcome bonus offer, allowing new players to benefit from four 100% Match Bonuses up to \$500 to play slots, and four 100% Match Bonuses up to \$250 to play other casino games. Players are given the freedom to choose whichever bonus they prefer or, should they want to try Bovad's whole assortment of games, they can opt to redeem both, allowing them to get up to \$3,000 in bonus chips. Players can also take advantage of great weekly promotions such as Happy Hour Thursdays and Blackjack Sundays, amongst many others. Players should check out [Bovada Casino](#) regularly as there's always a new promotion coming up.

For seasoned casino veterans, the [Red Room](#) is the place to be. This invite-only program lets players enjoy unprecedented VIP benefits, and they don't have to worry about things like casino etiquette or protecting their chips.

Security at Bovada Casino is taken very seriously. Their world-class system protects players' money at all times, whether their account balances come out to two or two thousand dollars. Even when games in-play are interrupted by a blackout or power outage, the casino software saves the game, which the player can resume when he logs back in later on.

Should anyone run into any discrepancy or issues, players may call the casino's customer service line at 1-866-234-1324, which is available 24 hours a day, seven days a week. This service team can also be contacted by email from a Web form on the Bovada Casino website and players can expect helpful responses within hours.

The games at the Bovada Casino use a pseudo random number generator which has been evaluated by the Gaming Associates and proved to generate uniformly distributed and statistically independent results, further ensuring a fair and unique gaming experience for each play of the hand, roll of the dice or pull of the lever.

For those not familiar with some of the more complex games such as Craps, Baccarat or Roulette, the casino has a slew of articles with tips and tutorials for players to learn from, which means a new game is never off limits.

With dozens of options including the 30-plus new 3D Slot games, excellent incentives and promotions, and top notch security, [Bovada Casino](#) is a one-stop shop for online casino action, morning, noon and night.

# Fisher Roulette Strategy!

It has been the goal of roulette players for over 200 years to find a foolproof way to beat the game.

Amazingly, the secret was hidden in the back of a book on roulette published 84 years ago!

The Fisher Roulette Strategy contains a previously undiscovered secret method that turns the tables on the roulette game.

Conclusive tests prove that you never need to lose at roulette again when you use this method.

I am going to reveal a rock solid way you can use to turn \$40 into an \$8,000 bankroll and then consistently make \$2,240 an hour playing roulette.

What's more, in the next few pages I am going to give you proof that you, too, can use the Fisher Roulette Strategy to "set yourself up for life!"

**I couldn't believe my eyes when I reviewed our first series of real world tests of an 88 year-old roulette system.**

This is a strategy that has never before been released to the public. As far as I can tell, it was never used after 1920 the date of the remarkable document that fell into my hands.

**In this day of high speed computer analyses it is easy to assume that roulette players playing the game almost 90 years ago used methods that are easily eclipsed by modern computer generated algorithms.**

Yet in this case, if you made this assumption you would be dead wrong.

People often forget that some of mankind's greatest accomplishments were the results of one man, working alone, without the benefit of computers, calculators, research grants, highly paid assistants or any of the other aspects of modern research that are considered essential by today's standards.

**Albert Einstein developed his theory of relativity working by himself.**

**Thomas Edison was essentially a one-person shop when he developed the incandescent light bulb, as well as the phonograph, motion pictures and a whole slew of devices we take for granted.**

**Galileo opposed the entire educated world and the almighty church when he proposed the then heretical idea that the earth revolves around the sun.**

**Even the modern personal computer was born of just a few individuals like Steven Jobs, Steve Wozniak, Bill Gates, Paul Allen and John V. Blackenbaker, working mostly outside of the establishment.**

**In fact, most of the creations that are of the greatest benefit to all of us, from the flush toilet, manufactured in the 1880s by Thomas Crapper's plumbing company, to the printing press, created by the German goldsmith Johannes Gutenberg, were the brain children of loners who had great moments of inspiration and then turned these visions into practical concepts.**

So, it shouldn't be a surprise that another individual, Samuel Fisher, developed an extraordinary new way of winning at roulette.

We have just finished testing this strategy and I can say, without any equivocation, that this roulette strategy is one of the most amazing I have ever seen.

*Our Tests of this Strategy Prove That When You Use the Fisher Roulette Strategy to Play Roulette, You Will Win Without Fail.*

I know that this sounds almost impossible to believe, but this is truly a system that you can use to play roulette as long as you like without fear of losing.

**We have used this system against every version of roulette offered today and found -**

- It beats the American version of the game which, using the double-zero wheel, is the hardest version to beat.
- It beats the European version of roulette in all forms offered.
- It beats the single-zero version of roulette found in Atlantic City.
- It beats online roulette hands down.

**There is no question that when you use this strategy you will be able to –**

- **Log on to [Bovada or Bodog's European Roulette games](#) and **within fifteen minutes bring in a profit of \$112!****
- Win more consistently than you can with any other gambling strategy. In fact, I will show you how **you can use this strategy and never again lose a session of roulette!**
- **Set up your own roulette business using the Fisher Roulette Strategy** to power your profits.
- **Set up profit goals and then realistically meet them every week, without fail!**

Let Me Tell You A Little More About the Fisher Roulette Strategy –

**The Fisher Roulette Strategy is designed for even-money bets at roulette. By even-money bets, I mean red or black, odd or even and high or low. With the exception of the zeros (single zero on European wheels, single and double-zeros on American wheels), the even-money bets cover half the numbers. The probability of their occurrence is almost 50%, about like flipping a coin. In the long run you can expect to win and lose roughly the same amounts of all even-money bets.**

There have been numerous systems designed for even-money bets, such as the double up Martingale system, d'Alembert, Ascot, the Labouchere or cancellation

system, Oscar's Grind and so on. All of these systems work for a while and then wipe out all of your profits, plus a good chunk of your bankroll when they fail.

If there were no table limits, even the classic Martingale system would beat roulette. You start by placing a one-unit bet on the table on an even-money bet. If you lose, you double your bet. Let's say you like to bet on the color Black. Assume you continue to bet on Black and Red comes up eight times in a row. Your ninth bet would be for \$511 (calculated as  $1 + 2 + 4 + 8 + 16 + 32 + 64 + 128 + 256 = 511$ ). You would be placing \$511 on the table to win a \$1 profit. If this wager lost also, you would be out \$511.

Most casinos would not let you go even this far. A casino accepting \$1 minimum roulette bets would probably have a maximum bet of \$250, limiting a Martingale to no more than seven levels. With a \$250 limit, you would not be able to make a larger bet than \$128 without running into the table limit.

**The attraction of the Martingale system is that you will win most of your bets. Unfortunately, setting maximum bets ultimately defeats this system. If a casino did not place a maximum on the size of the bets they accepted, then using the Martingale system would be a sure way to beat the casinos.**

Samuel Fisher was very aware of betting limits when he designed his roulette strategy. **Part of the beauty of it is that it can survive losing runs of eight, nine or even ten consecutive losses and still win, while staying well under the house betting limits.**

Fisher's betting strategy does not use a fixed progression for betting, like a Martingale. In fact this system has had no losing runs!

**Let me repeat this so that you realize the full impact of this statement –**

**When You Use The Fisher Roulette Strategy, You Will Never Have a Losing Session!**

**I Am 100% Confident That the *Fisher Roulette Strategy* Is The Perfect Profit-Maker For You!**

**There is no downside for you to try out this strategy. Getting this course is like getting a complete Turn-Key business that you can use to make very large amounts of money at very low risk of loss!**

**“I taught my wife to use it and she too is playing online. She just hit her first \$10,000 in winnings and is thrilled with your strategy.”**

**Chase M. – New Brunswick, New Jersey**

### *Why the Bulgarian Trap is so Deadly to the Casinos*

Before I go any further I want you to know that using *the Bulgarian Trap* in any blackjack game is akin to carrying a deadly weapon.

**It is so powerful and so effective that you will take money from any blackjack game in any casino where you play.**

And, when I say, “any blackjack game in any casino,” I mean just that.

**Unlike Other Strategies the Bulgarian Trap is Simple and 100% Automatic!**

Most Blackjack Strategies are very complex. They may have hundreds of different rules for playing each hand and equally complicated rules for deciding how much to bet.

The Bulgarian Trap is nothing like that! It uses one highly simplified playing strategy that works for all blackjack games.

Then it sets up traps that force the casino to bet more when it is less likely to win.

**Instead of being complex, it is simple!**

*This approach is unlike any other blackjack strategy –*

Over the past 30 years blackjack strategies have gotten more and more complicated.

There are entire books devoted to a single strategy.

They are filled with page after page of complex charts and calculations you are supposed to make when you play blackjack.

**The truth of the matter is that many of these strategies are so complex only a computer could use them.**

**“The Bulgarian Trap Strategy is a superior strategy. I had just about given up on playing blackjack because of casino rules changes like using continuous shuffling machines and reducing blackjack payoffs to just 6 to 5.**

“With the Bulgarian Trap these rule changes don’t seem to matter. I have been consistently beating six to eight deck games with every house favorable rule in place.

**“Anyone who gave up blackjack in disgust needs to try it with the Bulgarian Trap Strategy. They will love it!”**

**Sam T. - St Paul, Minnesota**

*The Bulgarian Trap* is Nothing Like Any of These Other Strategies.

**It is short and easy to learn.** If you know nothing about blackjack it will take you less than an hour to learn enough to start winning.

**No judgment is required.** Most blackjack strategies have you constantly trying to second guess the game. If the dealer shows this you must do that, but only if the dealer hasn't . . . (fill in the blank).

**With *the Bulgarian Trap* you will learn just a few simple rules that never change.** What's more, you can take these rules with you on a ***Pocket-sized Strategy Playing Card*** which summarizes this simple but powerful strategy!

**There is no card tracking, or card counting at all.** When you use *the Bulgarian Trap* you won't have to count any cards. You won't have to try to track a clump of cards through a shuffle. All you have to do is start playing using this proven universal blackjack beater!

**The playing strategy never changes.** Blackjack professionals would like to have you learn a different playing strategy (usually called "Basic Strategy") for each version of blackjack. This might not be too bad if you always played the same game in the same casino and the casino never varied its rules. But, life doesn't work like this. You might want to play in a different game.

Oops, you have to learn another playing strategy!

***The Bulgarian Trap* uses one simple, but deadly effective, playing strategy that works with every version of blackjack!**

**What's more, it is much easier to learn than any of the other so-called Basic Strategies floating around.**

*With the Bulgarian Trap You Will Never Have to Change Your Game to Try to Match the Flow of Any Blackjack Game.*

Many blackjack strategies have multiple rules on how you will change your bets and even your playing strategy throughout a game. Whether you are tracking shuffles, tracking cards or using

some sort of progression, you will constantly be second guessing the game and trying to get an edge.

**If these approaches to beating blackjack were really that effective, why don't we see more blackjack millionaires?**

I think you know the answer. When these systems call for you to zig, the chances are the dealer has already zagged. A perfect example of this is card counting. The theory is that by keeping track of cards played you will have a good idea of cards remaining unplayed.

This makes sense if the casinos would cooperate. But they don't. Many times as soon as a card counter raises his bet, the dealer will shuffle the cards.

Even if the dealer doesn't shuffle, there is still no guarantee that the player will get the cards he wants.

**And so the player using one of these strategies is thwarted. The player zigs, the dealer zags and the player loses again.**

Now, the experts won't like this but this is pretty much how it goes with just about any blackjack strategy, system or method.

**And, making the systems more complex has really not solved the problem. Every one of these systems is trying to predict the future and having you adjust your play for some possible future event.**

Have you ever heard the expression, "Just announce your plans and watch God laugh?"

It seems totally bizarre that none of these experts ever figured out that maybe they were on the wrong track and that no matter how complex their systems became, they were never going to be all that accurate in predicting the future.

You Will Experience Instant Profits Using *the Bulgarian Trap* . . .

Unlike some moneymaking methods that require weeks and even months to produce a profit (or never produce a profit at all), you can start making money with this incredible package as soon as you get it.

All you have to do is turn to the *Quick Start Guide* and go to the Strategy Summary. Everything is summarized and ready for your use.

**Get online, log onto [Bovada Casino](#) and you can start pulling in winnings in the first five minutes!**

**If you are more cautious, you can practice for a while in "play mode" and prove to yourself just how profitable this strategy is.**

My point is, once you get this package you can start making money immediately.

**And, because you can get started online for as little as \$30, there will be nothing to hold you back.**

If you have ever truly wanted to work for yourself from home, then there is no better program than this one.

I urge you to get started now. I know you will be totally delighted with how easy it is to learn.

An hour from now, you can still be stuck in the same old rut.

**Or, you can be rapidly building profits just like my student Sue L. from Dallas, Texas.**

Even As You Read This, Players Using This Strategy Are "Winning a Fortune" Off Blackjack Games All Over the World.

Right now, players using this "new way" of playing blackjack are cleaning up at blackjack.

And, the casino bosses cannot stop us because any countermeasures that they can take have little effect on our ability to win.

Let me tell you a little more about blackjack. . . .

The casinos love this game because players have heard that it is beatable and therefore think that they can win.

The casino bosses know the sad truth -

**Nearly every blackjack system being taught is doomed to fail because of the changes made to the game over the past twenty years!**

The bosses love the stories about card counters winning millions off of casinos because it encourages more new players to think that they can win at a game that the bosses know is now just about unbeatable.

The sad truth is that the casinos hold and keep an edge of anywhere from one-half to as high as ten-percent against most blackjack players. While this may not sound like much, it is enough to provide billions of dollars in profits to the casinos and allow them to constantly expand, offering ever more elaborate profits.

Blackjack is the number-one table game for casino profits. Except for my select players and me. Using our methods, we have turned this game upside down – **Instead of being a huge profit source for the casinos, we use it like our personal ATMs, pulling out profits at will.**

As one of my players, Mark T., says **"I believe that this is the strongest profit maker I have ever seen. It is a truly beautiful thing to experience money just rolling your way, hour after hour, day after day."**

You Can Start Making Money Instantly With This Strategy.

# Gamblers Bookcase Baccarat Systems for Bovada/Bodog:

**Baccarat, also known as punto banco, is one of the oldest and most popular games in casinos all over the world. It is especially popular among high-rollers and Asian gamblers. In Macau, baccarat is extremely dominant. Although the game seems serious and elegant, it is really as simple as betting on the flip of a coin.**

## **Format**

**There are three types of baccarat tables:**

**Big Table Baccarat is played in a snooty roped off area to separate itself from the other games. The players are usually very well dressed and the table minimums are often high. The regular baccarat table is about the size of a craps table with 3 casino dealers and up to 12 or 14 players. Each player, including the player dealing, may still bet on either the player or the banker but it is customary for the dealer to bet on the banker.**

**The deal will rotate around the table, much like the dice rotate around the craps table. If a player does not want to deal they may pass the shoe to the next player. The same person will keep dealing as long as the banker keeps winning. The person dealing will put two cards, face down, tucked under the shoe, and give the player with the greatest bet on the player the other two cards, face down. This player then looks at the cards and then gives them back to the player who is dealing. Then the player who is dealing will turn over the cards and one of the casino dealers will announce the totals. Depending on the totals, the dealer may then instruct the person dealing the cards to deal a third card. Finally the dealers will pay winning wagers and collect losing ones out of the dealer's tray. The player who actually deals is not assuming any financial responsibility of the other players bets, unlike pai gow, and is just turning over cards.**

**Mini baccarat has the same rules as big table baccarat. However, unlike the game at the big table, the dealer turns over all the cards, making for a much faster game. The odds are exactly the same as those of the big table, assuming the same number of decks. Mini baccarat is sometimes dealt from a six-deck shoe, changing the odds slightly. It can usually be found in the main casino areas.**

Midi baccarat is the same as mini baccarat, except the size of the table is larger, and it is usually found in the high-limit rooms, as opposed to the main casino floor.

Bovada's version is based on the [Mini Baccarat Version](#) which offered extraordinarily good odds for the players with a house edge of 1.06% on the banker bet, 1.24% on the player bet, and 14.36% on the tie.

- **How you will use this powerful new system to simply overpower and beat baccarat** wherever it is offered – including [Bovada Casinos' version of baccarat!](#)
- **Why baccarat is the number one best casino game** to use as a source of a reliable and totally predictable income.
- **Why you won't need any experience** to start beating the game thirty minutes after you read the information package I have prepared for you!

My name is Greg Fletcher. If you are like me, you are very skeptical of anyone who claims to have developed an easy way to make money – Especially if they are talking about a gambling system. Most of the systems offered today are simply “hashed over” versions of gambling systems that have been around over 100 years.

I am prepared to give you irrefutable proof that the ***Baccarat Attack Strategy*** is different and more effective than any other baccarat strategy ever created!

To back up this claim I am going to take you on a step-by-step tour of what has been called ***“the Ultimate High-Profit Baccarat Strategy.”***

What's more, I don't expect you to take anything on faith. That's why I am going to give you completely documented proof that I really have created the ultimate way of beating baccarat.

I will lay out everything I can about the amazing new Baccarat Attack Strategy. And, **I will show you how you too can join the small group of players who are pulling in large winnings off baccarat – worldwide.**

[Watch How the Baccarat Attack Strategy](#) Rolls Over the Game of Baccarat Using an Automatic Betting System!

Discover How the Uniquely Powerful *Baccarat Attack Strategy* Simply Demolishes Every Version of Baccarat Found in Any Casino, Including Those Offered by Online Casinos!

The Baccarat Attack Strategy is unlike any strategy or system ever developed for baccarat. It is based on a unique way of ***slicing and dicing the baccarat game into smaller segments*** and then simply overcoming each part of the game. It may be helpful to think of this as a special case of applying the strategy of “**divide and conquer.**”

This unique approach to playing and winning is called “Attack, Retrench and Win.”

Here’s how this works –

**You will “Attack” the game when you are in a winning mode.** You will recognize this mode because you will be winning a high number of bets. You might think of it as a gambler’s dream. These winning periods can be very brief or sometimes quite lengthy.

**A key aspect of the Baccarat Attack Strategy is that you will immediately know when you are in a winning mode so that you can go on the Attack and start pulling in one winning wager after another.**

However, unlike other simplistic systems which use such methods as doubling your wager following a winning one (called a parlay), the Baccarat Attack

Strategy uses a scientifically developed approach that allows you to capitalize on a winning streak ***without putting your previous winning bets at risk.***

What this means is that when you are on the “Attack,” you will be pulling in money almost faster than you can stack your winnings in front of you! And, you will do it with zero risk of giving back your previous winnings!

The other side of gambling is the opposite of a gambler’s dream and is more like his nightmare. This is when the player can’t seem to get ahead and is losing bet after bet. Most systems ignore these losing streaks. I call these losing strategies “**good time systems.**” So long as you are winning, you will have a good time. However, when the game turns nasty, look out. You will lose back any winnings very quickly and may even lose your bankroll faster than you can say, “curses, screwed again.”

That’s where the ***Baccarat Attack Strategy*** really shines. Unlike one of these good time systems, where all you can do is hope that you stop losing before you are tapped out, my system automatically puts you into a ***Retrenching mode.***

Instead of repeating the same ineffective moves over and over and losing, **you will instantly shift into the highly effective Retrenchment Betting Mode and start recovering your losses.**

While there are a number of other techniques that are part of the strategy, the heart of the amazing ***Baccarat Attack Strategy*** is its unique ability to automatically switch from Attack to Retrenchment playing modes.

There is no question about the results of learning this amazing new way of play – **Your winnings will skyrocket.**

Nothing you have ever experienced has prepared you for the sheer power and feeling of confidence and control you will have when you gain the power of “Attack, Retrench and Win.”

**You don’t have to learn any complicated rules or keep track of your betting. Your Baccarat Attack Strategy comes complete with our perfected BAT Bet Tracker. When you use the BAT Bet Tracker there is no guesswork. Your BAT Bet Tracker will show you –**

- How much to bet as your first or **Starter Bet.**

- When to go into **Attack Betting Mode** and push the casino up against the wall as you win bet after bet.
- How to move into the **Retrenchment Betting Phase** and rapidly recoup losing bets.
- The **size of every bet.**
- **Where to place every wager.**
- **When to lock up your profits** and call a game finished.
- **When to extend your Profit Target and pull in huge amounts off the casino** without risking losing your “locked up profits.”

You have a **Full Year** to profit from the Baccarat Attack Strategy. And, I feel so strongly that this strategy will work for you just as well as it has for us that **I guarantee that you must make at least \$25,000 when you try it.**

Even if all you do is **sign up with Bovada** and pick up \$500, I think you have to agree that this is a whale of a deal.

Now it is up to you. Order now and you can be making \$5,000 a day by tomorrow!

## Super Slots!

Win at Least \$150 an Hour  
Playing Slot Machines!

The Super Slots Strategy is a powerful way to win at slot machines.

It is a 100% modern strategy, developed for modern computer-chip controlled slots.

Remarkably, it beats slot machines everyone – even the online slots!

[Let me tell you a little more about this system.](#)

It is geared strictly to playing the computer controlled modern slots.

You won't find any hints on how to jerk the lever just right, or any of the other old slot machinations, because these techniques have absolutely no effect on the microprocessor controlled slots found in casinos today.

What you will find is the most complete slot system ever developed to beat the slots you will encounter in the 21st Century!

Everything you need to know to beat modern slot machines is revealed in a the "Slots Strategy Toolkit."

Are you still skeptical? Believe me, I was very skeptical when I first learned about this strategy.

However, the proof is in.

We have documented thousands of hours of slot machine play and the results of hundreds of persons "testing" this system and there is no doubt that you consistently beat the slots using this strategy!

The Super Slots Strategy is like nothing you have ever seen-

- It doesn't involve guesswork.
- You don't have to be lucky to win with it.
- You don't need much money to use it.
- You don't need to win jackpots in order to win. \
- It isn't limited to just a few slot machines (that you can never seem to find).
- It can even be used to play (and beat) slots in online casinos.

In fact, this "Super Slots Strategy" is not like any system ever written about slot machines.

It is a Guaranteed 100% Effective Money Maker that wins consistently, with only a minimum investment.

Nothing is left out in the dynamic manual and slots toolkit I have waiting for you. You will learn -

- Where the best places to play slots are located.

- The best machines to play to maximize your winnings.
  - How to find high payoff slots in any casino!
  - The perfect playing strategy which wins consistently and protects your bankroll at all times.
  - Complete instructions so that you can win wherever you decide to play slots!
- 

Michael L. from Riverside, California, told me, "I haven't lost since I purchased your slots manual. **My worst trip to Las Vegas was a break even and my best I was up \$2,000.00 + expenses paid.** I missed a few big jackpots because I wasn't at max bet. But, that's OK because I would have long been out of money without your manual."

---

Jack J. who lives in Lancaster, California, played slot machines using my methods on his wife's birthday. He wrote me -

"On May 1, we were celebrating my wife's 74th birthday at the Las Vegas Hilton, and employed your strategy. We had **GREAT SUCCESS** at the slot machines. I might say, that we left the Hilton with a few bucks."

"I have been using your Super Slots System to play one-dollar slots at the Minnesota and Wisconsin Indian casinos. It works very good if you follow your system.

**"In five days I won \$350, \$500, \$200, \$450 and the last time \$900."**

---

I could go on and on. I could tell you about the man in Seattle, Washington, who averages \$1,000 a day playing slot machines online.

---

Or, the little old lady from Patterson, New Jersey, who has turned "slot machine play" into a very lucrative retirement.

Or, the college student who tried to make money playing poker, failed and now uses the Super Slots Strategy to bring in over \$500 a day.

---

## Power Video Poker!

“\$1,000 a Day Playing Video Poker!”

Can you use a \$1,000 a day?

There is no easier way to make \$1,000 a day than to become a video poker pro.

You may have read about people that do this.

Usually they have to spend eight hours or more playing video poker very rapidly and then hope they'll clear a couple of hundred dollars.

I don't know about you, but this sounds like too much work for me!

We've discovered a better way.

**My good friend, the stock trader Greg Fletcher, totally analyzed video poker and developed what may be the easiest winning system ever.**

It is a system that wins at least \$1,000 a day playing video poker without fail!

**Moreover, it is a “quick-win system.”**  
**Instead of playing video poker for eight hours, you’ll play an hour and a half on the average.**

**And instead of having to memorize thousands of different hands and how to play them, you’ll simply refer to your pocket-sized chart.**

**And, you can use this system at [Slots.lv](http://Slots.lv) so you don’t have to leave home to win a \$1,000 a day!**

**Are you ready to get started?**

**If You’ve Got \$10 You Have Enough to Prime This System.**

**What’s more, even if you don’t know a thing about poker, you’ll be able to quickly master this strategy!**

**Even if you don’t know a flush from a full house, it doesn’t matter. With this foolproof strategy you’ll make more money than almost any poker or video poker professional.**

**In fact, %\$firstname\$, our tests show that if you play at [Slots.lv](http://Slots.lv) with this strategy, you can easily make \$147 every ten minutes you play.**

**And, what totally blows me away is that you can get started easily bringing in from \$1,000 to \$3,000 a day with only \$10 at risk.**

**What’s even more remarkable is that you will do this without having to deal with the obnoxious players, long hours and horrible bankroll drawdowns that conventional poker players face.**

I am going to show you how you can use Greg Fletcher’s amazing new “Power Video Poker Strategy” to create a virtually unstoppable source of high income with low risk and the most pleasant hours possible.

“This is truly the thinking person’s way to make money. It is quick, slick and foolproof. I give it a 100% recommendation.”

If you have tried conventional poker and become disgusted at the hassle, hype and just plain difficulty of winning consistently, or if you have been looking for the perfect small business that you can operate profitably from your home, then you need look no further.

Learning to play and win at video poker is superior to any other form of poker and beats every small business strategy around.

After experiencing how easy it is to win large amounts of money, day after day, with almost frightening consistency, I am convinced that using this proven strategy to win at video poker is the Number One Money Maker available today.

If you are caught up in the nationwide poker craze that has swept the world, then this special report is for you.

Even if you aren't a poker player, but would like to learn about what is easily the most powerful way to make lots of money quickly and with great certainty of success, then you must read on.

**As crazy as it may seem, using this perfected way to play video poker is better than anything else you can try.**

**It is much better than any form of conventional poker.**

**You'll make much more money than you ever would playing Texas Hold 'em, Seven Card Stud or any of the hundreds of poker variations being played today.**

**Using this unprecedented profit producer is vastly superior to any MLM, mail order or Internet based money making scheme.**

**There is simply no way you can ever make the kind of consistent money from conventional poker or any other small business or business opportunity than you can from learning this breakthrough, never before released strategy for playing and winning at video poker!**

**What's more, I will back up this statement with an unprecedented \$10,000 Guarantee.**

Simply stated, if you don't make at least \$10,000 using this proven strategy, then we will refund every cent you paid.

**This approach to playing and beating video poker is like no other one ever developed.**

Instead of focusing on just refining your playing skills, Greg Fletcher put together the most comprehensive profit directed strategy ever created.

When you use his Power Video Poker approach, you will be 100% focused on creating and keeping profits. This is a 100% tested and proven system that –

- You can use to **consistently beat video poker in every form** – even in online casinos!
- You can use to quickly pull in high profits – **within ten minutes you will be able to make \$150 or more** and then repeat this process over and over.
- You can use to **bring in incomes of \$5,000, \$6,000, even \$9,000 a week** without any of the hassles faced by typical poker players.
- Is **100% perfected and ready for you to use.**
- You can use to **set up your own ultra high profit "poker business"** that will pull in money so fast that, at first, you will hardly believe what it is happening to you.

**What's more, once you have this never before revealed strategy, you can continue to bring in profits of \$1,000 a day or more even if you have never played poker before.**

The Power Video Poker Strategy is not like any other poker or video poker strategy currently being used.

**You can download the powerful [Power Video Poker Strategy](#) in the next five minutes.** After downloading it, turn to page 8. Here is the “quick start guide” that you can use to get started making money very quickly.

## Tri-Card (Three Card) Poker

The game of Tri-Card Poker is played between a Dealer and a Player with a 52-card deck. Tri-Card Poker is two games consisting of the Ante and Raise and Pair Plus. The object in the Ante and Raise portion is to receive a higher 3-card poker hand than the Dealer.

The object of the Pair Plus game is simply to bet on whether you will receive a 3-card poker hand with any pair or better. The Player may bet on either or both games for any amount within the posted table limit. The bets do not have to be equal amounts.

Although this game is not as popular as blackjack, roulette or craps it is an excellent game to learn. We offer the Power Poker Strategy which is optimized to beat [Bovada's version of Tri-Card Poker](#).

## Power Poker Strategy!

Would you like to win \$5,271 this weekend?

**It's easy with this "\$2,000 an Hour" proven Power Poker Strategy!**

We have come up with the world's most powerful winning strategy for the game of Three Card (Tri-Card) Poker!

What's more, it is easy to learn, takes almost no money to get started and throws off winnings like crazy.

Plus, you don't need to know a thing about poker or Three Card Poker to win huge amounts with this strategy.

Even if you don't know a flush from a full house, it doesn't matter. You'll master this proven strategy in less than an hour. And, you'll be on your way to winning a fortune!

**Several of our players using this strategy are bringing in \$4,000 to \$5,000 an hour using the same techniques I am going to share with you!**

What's more, this strategy does much more than pull in \$4,000 to \$5,000 every hour –

**In addition, you will also hit jackpot-like wins very frequently!**

**That's because Three Card Poker (called [tri-card poker at Bovada](#)) may be the best casino game ever created for pulling in sky-high winnings!**

But, this is not your father's poker game.

Even if you think you know poker, Three Card Poker is a very different game.

While it uses poker card values, the similarity to regular poker stops there. Three Card Poker is strictly a casino table game, just like blackjack or baccarat.

However, Three Card Poker has a huge advantage over other casino table games –

**With Three Card Poker you can still win even when the dealer's hand beats yours.**

Sounds crazy, but it is true.

And, **here's another fact that will put a lot of money in your pocket – With Three Card Poker you can win thirty to forty times your bet in a single hand!**

The best you can win on a blackjack hand is a payoff of 3 to 2 for a blackjack.

At baccarat the only win that pays more than even-money is a win on a Tie bet, which you will never make because of atrocious house odds.

**However, with Three Card Poker you will be paid much higher than even-money for some wins.**

**Any Pair pays off 1 to 1.**

**A Flush pays off at 4 to 1.**

**A Straight pays 6 to 1.**

**Three of a Kind pays a generous 30 to 1.**

**And, a Straight Flush pays a highly profitable 40 to 1!**

If you have played any version of five-card poker, you know how hard it is to make some of these hands.

**However, these hands are much easier to make with Three Card Poker because you are only playing with three cards.**

**Straights and Flushes are very common in the game.**

**And, you will frequently get Three of a Kind hands paying off at 30 to 1. You are probably thinking that Straight Flushes paying 40 to 1 are rare.**

**But, they are not.**

**Play just two hours and you will typically win one or more of the higher payoff hands.**

These hands are much easier to make than in video poker or any version of five card poker because it only takes three cards to make a flush, straight, three of a kind or straight flush.

**Here's what Glen A., who lives in Las Vegas, Nevada, has experienced using our Power Poker Strategy –**

**“I am winning a lot of money with the Power Poker Strategy. I play in a local casino two days a week and then play four or five sessions a week at [Bovada Casino](#).**

**“I easily clear over \$11,000 a week.**

**“This is by far the best poker strategy ever. Thanks for letting me in on it.”**

Here is a little of what you can expect once you start using this strategy -

- **You will win explosive profits with limited downside risk. There is no other strategy like it!**
- **Your winnings will be very consistent. This is a reliable system that you can use day in and day out with predicible high profits!**

If you order right now, you will also get the Automatic Bet Selector as our gift to you. This Bet Selector totally automates your play. To use it, all you have to do is set it up for your level of play. If you are a \$1 bettor, you will set it for this level. If you make \$5 bets, set the Selector for this level.

After it is set, it will give you the size of each bet, keep a running total of your profits and show you how to lock up profits and continue playing with no risk of loss. It will even show you when to call a game over and walk off with your profits!

## Who Was Leonardo of Pisa Who Called Himself Fibonacci?

### Why is his mysterious series of numbers so powerful?

Fibonacci Numbers have a special relationship to the Golden Ratio, sometimes called the Golden Section, the Golden Mean, Divine Proportion and Golden Proportion.

Fibonacci's Numbers are Nature's numbering system. They appear everywhere from the arrangement of leaves in plants to the design of a pinecone.

**These numbers are applicable to the growth of every living thing, including a single cell, a grain of wheat, a hive of bees or even all of mankind.**

In the *The Da Vinci Code* the numbers are used to unlock a safe.

Fibonacci numbers often appear in the organization of music.

They have even been called "God's Equation."

**These numbers form the basis of a whole area of technical trading used to trade stocks and other securities.**

And, they have very special properties for gambling.

**Several years ago a system based on using these numbers was sold at \$100 a copy. Amazingly, even though this was a crude system, it actually worked!**

**You don't have to track long strings of bets.**

**You don't have to write anything down.**

**Or, make calculations of any kind.**

**Just follow the flow, apply a few simple rules, and you will be winning a majority of your bets.**

## Steiger Bet Selection Is So Effective That You Can Win Making Flat Bets!

**Just follow the flow of the game.**

**And place your bets using the Steiger formula.**

**It's really that simple.**

If you are tired of having to use betting systems or progressions, you can just pick your size of bet, stick with it and still win.

I consider this **the ultimate tribute to the real power of Steiger's amazing Auto-Flow Formula for bet placement.**

However, when you are ready to move up to the big time, you'll want to add the Hammer Bet to your play!

The Six-Bet Betting System was originally developed for a billionaire who wanted to win back his losses at baccarat.

**Based on his success this system is outstanding. He won back his losses and more.**

**But, the Six-Bet Betting System is a whole lot more than a high-roller baccarat strategy!**

It literally tears up the games of roulette, craps, mini-baccarat, Sic Bo and even blackjack.

And, it wins super fast using a tiny bankroll!

The Six-Bet System Is Easy To Use And Is Very Powerful!

- You **don't have to keep track of decisions.**

- You **never have to write anything down.** (I used two chips to guide me through all of my play.)
- It **doesn't take much money.** As you know, \$35 is all you need for \$5 play.
- It is **not hard to use.** Can you count to six? Then you have half of the system down.

And, it has a couple of secret weapons that put it in a category way beyond other systems –

They are Strike Bets and Six-Bet Coups!

**“The Six-Bet Betting System is a stunner! I quickly grew \$35 to \$27,000 following your recommendations. I have now settled into playing at [Bovada Casino](#) making \$25 bets. I am averaging \$1,194 an hour. I am very pleased with this strategy.”**

## Strike Bets Kick The Winnings Into Overdrive!

The Six Special Bets are all you need to win with the Six-Bet System. However, under certain circumstances you will change one of these bets into a Strike Bet!

**When the time is right you will turn a regular bet into the more powerful Strike Bet.**

**Strike Bets are bets that are higher than normal. Certain circumstances “set up” each Strike Bet.**

I am not talking about parlaying a win or a simple progression-regression move.

The Strike Bet is only made when it is favored to win!

**This bet provides much of Six-Bet Betting's ability to bring in wins so quickly.**

Think of it this way –

The **Six Special Bets are enough to win.** When the Strike Bet is added, you not only win but you win at blazing fast speed!

**The Strike Bet is designed to kick up the win rate.** And it does this with proven efficiency!

## Locking Up Wins With Six-Bet Coups!

The other secret weapon used by Six-Bet Betting is the Six-Bet Coup!

The **Six Special Bets are designed to quickly win Six-Bet Coups.**

A Six-Bet Coup is a profit goal easily reached by combining the Six Special Bets with the high winning power of the Strike Bet.

Tested over thousands of rounds of play in real-life games, we determined that it takes just 9.3 rounds of play to win a Six-Bet Coup.

Now, that may sound like a lot of wagers to win one coup.

Except for one thing I forgot to mention –

Winning one Six-Bet Coup is all it takes to wrap up a winning game.
