How to Use This Book

This manual is a supplement to the manual – *Six-Bet Betting*. It is set up to show you how you can easily build a bankroll of \$100,000 using your winnings from the playing baccarat and using this strategy.

You can get started using *Six-Bet Betting System* with a game buy-in as low as \$35 making \$5 base bets. You can play at this level in most online and land-based casinos.

How would you like to have \$100,000 that is yours to do what you want with it? Sound farfetched? It's not. In fact, you can do it easily if you follow the plan in this book. And, playing online, you can turn \$35 into \$100,000 in just seven days!

We'll will show you two paths to building a \$100,000 bankroll using *Six-Bet Betting*:

- a. Playing in the slower baccarat games in land-based casinos or
- b. Playing in the faster online baccarat games.

Playing in land-based casinos, you will learn how to increase your bankroll from \$35 to \$100,000 in just 56 hours.

With online play, starting with a \$35 bankroll, it will take just 26 hours of play to increase your bankroll to \$12,000. If you play four hours a day you can easily turn \$35 into \$100,000 in the next seven days!

Having a \$100,000 bankroll will open many opportunities to you. For example, as a player in land-based games, you will easily be able to play using \$1,000 base bets and if you play 20 hours a week, win \$123,840 a week.

Because of lower betting limits, you may be limited to becoming a \$200 base bettor in the online baccarat games. This is still not a bad thing, as playing 20 hours a week online at this level will net you about \$103,200 a week!

The key to success to winning with *Six-Be Betting* is money management. This strategy is based on controlling risk and constantly adjusting your betting mode to match the tempo of the game.

Before you embark on this plan to grow a \$100,000 bankroll you will need to have mastered the strategy and played a number of practice games with smaller stakes. I recommend playing baccarat Bodog casino (<http://www.bodoglife.com/>) in practice mode.

Whenever you are ready you can move to playing with real money. After you have become proficient you may wish to follow the plan described in this book to grow your own \$100,000 bankroll.

Your Bankroll

Your bankroll is the amount of money set aside strictly for gambling. Each level of play using the Six-Bet Baccarat System has its own bankroll requirements.

The table below summarizes the bankroll requirements for *Six-Bet Baccarat*. All of the assumptions and tables in this book are based on the assumption that you use the bankrolls specified for each level of play, as shown in Table 1 following.

Table 1. Six-Bet Baccarat Bankroll Levels

Base Bet	Game Bankroll	Total Bankroll
5	35	175
10	70	350
15	105	525
20	140	700
25	175	875
35	245	1225
50	350	1750
75	525	2625
100	700	3500
200	1400	7000
300	2100	10500
400	2800	14000
500	3500	17500
1000	7000	35000

Here is a brief explanation of Table 1:

Base Bet. This is the size of your lowest bet for each level of play.

Game Bankroll (Buy-in). Your Game Bankroll is the amount you will buy-in with when you start a game. Since much of the success of Six-Bet Baccarat is based on money management, it is very important that you adhere to these bankroll guidelines.

Total Baccarat Bankroll. This represents the total amount of cash you have set aside for playing baccarat using *Six-Bet Baccarat*. The minimum starting bankroll is \$35 as the Game Bankroll for \$5 Base Bets.

Our plan to build your own \$100,000 bankroll assumes that you start play at the lowest level of play and increase the size of your base bets as your bankroll grows. In this plan we will start with the Game Bankroll for \$5 bets of \$35. If you are more cautious, you may wish to start with the Total Bankroll recommended for \$5 bets of \$175.

By following this plan you will only increase the size of your bets after you have grown the minimum gambling bankroll shown in the table above for each level of play. Thus, to play with \$10 unit bets you will need a total bankroll of at least \$350; to play with \$25 unit bets, you will need a bankroll of \$875.

Hourly Win Rates

How quickly you can make money using this plan depends on the size of your bets and the speed of the game. Obviously, you can win more per hour if you make larger bets.

Likewise, if you play in a faster game you will be able to win at a faster rate.

The table below shows the hourly win rates used in this book to develop the plan to grow your bankroll.

Table 2. Expected Hourly Win Rates at Various Levels and Speeds of Play

<i>Base Bet</i>	<i>Amount Won Per Round</i>	<i>Land-base Game (60 Rounds per Hour)</i>	<i>Online Game (250 Rounds per Hour)</i>	<i>Game Bankroll</i>	<i>Total Bankroll</i>
5	0.516	\$30.96	129	35	175
10	1.032	61.92	258	70	350
15	1.548	92.88	387	105	525
20	2.064	123.84	516	140	700
25	2.580	154.80	645	175	875
35	3.612	216.72	903	245	1225
50	5.160	309.60	1290	350	1750
75	7.740	464.40	1935	525	2625
100	10.320	619.20	2580	700	3500
200	20.640	1238.40	5160	1400	7000
300	30.960	1857.60	NA	2100	10500
400	41.280	2476.80	NA	2800	14000
500	51.600	3096.00	NA	3500	17500
1000	103.200	6192.00	NA	7000	35000

Interpreting this table is very straightforward. Let's consider the options available to a \$5 bettor.

In a land-based baccarat game the \$5 bettor will be able to find mini-baccarat tables with 60 rounds of play per hour. This offers him the possibilities of earning about \$31 an hour

as a \$5 bettor.

If he continues to play in games with 60 average hands per hour the only real opportunity of earning more per hour is to increase the size of his wagers. Playing in games with 60 spins per hour he can double his hourly winnings to \$62 an hour by moving up to making \$10 base bets.

Another option for the \$5 bettor to increase his hourly winnings is to play in the faster online games. The games shown with rates of 250 rounds of play per hour or greater are online games. Let's assume our \$5 bettor starts playing in an online casino at the rate of 250 rounds of play per hour. Now, betting at the same level, he can increase his hourly winnings from \$31 an hour in the 60-hand per hour game to \$129 an hour in the 250-hands per hour game.

We develop two different pathways for growing your bankroll in this book.

Plan One assumes that you play in land-based games played at 60 spins per hour. Here we will start with a \$35 bankroll making \$5 Base Bets.

Plan Two assumes that you play in online games at the rate of 250 spins per hour. Here, we will also start with a bankroll of \$35, making \$5 bets.

How to Win \$100,000 Playing Baccarat

We will show you two different plans to build a bankroll of \$100,000.

Plan One assumes that you play in land-based games averaging 60 hands per hour.

Plan Two assumes play in faster 250-hand per hour online games.

We follow a similar approach in either plan. We start play at the \$5 level and increase our level of play as our winnings build enough to support the bankroll requirements of higher play.

Plan One – Building a \$100,000 Bankroll at 60 Rounds of Play per Hour in a Land-Based Casino

The following table summarizes the plan to build a \$100,000 bankroll in games played at 60 hands per hour.

We assume that you follow the rules for *Six-Bet Baccarat* and that you increase your level of bets after you increase your bankroll enough to cover the next higher level of play.

Here is how the table is set up:

Base Bet Size – shows the level of play. Each level of base bet has its corresponding betting limits, loss limits, target win levels and so on.

Bankroll Needed for This Level of Play – shows the bankroll needed for each level of play shown in the same row.

Winnings Needed to Reach Next Base Bet Level – shows how much must be won at each level in order to have a large enough bankroll to play at the next higher level.

Average Hourly Winnings at Level Played – is the average net winnings per hour for that level of play and that speed of game.

Hours Needed to Win Additional Bankroll– computes the time in hours to win enough at the average win rate for the level being used to move up to the next level.

Bankroll After Play– is a recap of the total bankroll after completing the play for each level of the table.

**Table 3. –Plan for Winning \$100,000 in Land-based Play
Assumption: 60 Rounds of Play per Hour Using Six-Bet Series**

<i>Base Bet</i>	<i>Bankroll Needed for this Level of Play</i>	<i>Winnings Needed to Reach the Next Base Bet Level</i>	<i>Average Hourly Win at 60 Hands per Hour</i>	<i>Hours Needed to Win Additional Bankroll for Next Level</i>	<i>Bankroll After Play</i>
\$5	\$35*	\$315	\$30.96	10.17	\$350
\$10	\$350	\$175	\$61.92	2.83	\$525
\$15	\$525	\$175	\$92.88	1.88	\$700
\$20	\$700	\$175	\$123.84	1.41	\$875
\$25	\$875	\$350	\$154.80	2.26	\$1225
\$35	\$1225	\$875	\$216.72	4.04	\$1750
\$50	\$1750	\$875	\$309.60	2.82	\$2625
\$75	\$2625	\$875	\$464.40	1.88	\$3500
\$100	\$3500	\$3500	\$619.20	5.65	\$7000
\$200	\$7000	\$3500	\$1238.40	2.83	\$10500
\$300	\$10500	\$3500	\$1857.60	1.88	\$14000
\$400	\$14000	\$3500	\$2476.80	1.41	\$17500
\$500	\$17500	\$17500	\$3096.00	5.65	\$35000
\$1000	\$35000	\$65000	\$6192.00	10.50	\$100,000
Total				55.21 Hours Rounded = 56 Hours	\$100,000

* Start with Game Bankroll of \$35. After that we require winning an amount equal to the Total Bankroll.

Let’s review a couple of rows in the table. We start with a Game Bankroll of \$35. This is the minimum amount needed to correctly play *Six-Bet Baccarat Series* using \$5 Base

Bets. At this level of play we expect to win at the average rate of \$30.96 an hour. Our first goal is to win enough to move up to playing at the \$10 base bet level, which requires that we win \$315. At our average win rate of \$30.96 an hour in games averaging 60 hands per hour, it will take over ten hours of play to win \$315 and build a bankroll of \$350, required to play at the \$10 base bet level. This is summarized on the row of the table for \$5 base bets.

Let's take a look at the second row for \$10 base bets. Here we start with our bankroll of \$350 and we are playing to win another \$175 and build our bankroll up to \$525, the amount needed to play with \$15 base bets. Our average hourly win rate making \$10 Base Bets is \$61.92 an hour and it takes us 2.83 hours to win the additional \$175 we need to move up to the next level where we will play with \$15 base bets.

We continue in this fashion, winning enough at each level to build our bankroll large enough to play at the next level. Moving from \$15 to \$20, then \$25, on to \$35, up to \$50, then \$75, \$100, \$200, \$300, \$400, \$500 and finally \$1000 base bets, it takes us a total of 55.21 hours, rounded to 56 hours to win \$100,000. If you played baccarat four hours a day you could build a \$100,000 bankroll in just 14 days.

Plan Two – Building a \$100,000 Bankroll at 250 rounds per hour in an online casino

The next table summarizes the plan to build a \$100,000 bankroll in games played at 250 hands per hour.

We assume that you use Six-Bet Baccarat and move up through the same levels as was done to build a \$100,000 bankroll in the slower 60-hand per hour land-based games.

**Table 4. Plan for Winning \$100,000 in Online Play
Assumption: 250 Rounds of Play per Hour Using Six-Bet Series**

<i>Base Bet</i>	<i>Bankroll Needed for this Level of Play</i>	<i>Winnings Needed to Reach the Next Base Bet Level</i>	<i>Average Hourly Win at 60 Hands per Hour</i>	<i>Hours Needed to Win Additional Bankroll for Next Level</i>	<i>Bankroll After Play</i>
\$5	\$35*	\$315	\$129	2.44	\$350
\$10	\$350	\$175	\$258	0.67	\$525
\$15	\$525	\$175	\$387	0.45	\$700
\$20	\$700	\$175	\$516	0.34	\$875
\$25	\$875	\$350	\$645	0.54	\$1225
\$35	\$1225	\$875	\$903	0.97	\$1750
\$50	\$1750	\$875	\$1290	0.68	\$2625
\$75	\$2625	\$875	\$1935	0.45	\$3500
\$100	\$3500	\$3500	\$2580	1.36	\$7000
\$200	\$7000	\$93,000	\$5160	18.02	\$100,000
Total				25.92 hours Rounded = 26 Hours	\$100,000

* Start with Game Bankroll of \$35. After that we require winning an amount equal to the Total Bankroll.

This table is interrupted in exactly the same way as the prior table summarizing baccarat games played at 60 rounds per hour. Here, at the faster 250-round per hour rate, we are able to build a bankroll of \$100,000 in 26 hours. If you play four hours a day you can complete this plan in the next seven days!

Summary of Results

There is no question that you use the power of *Six=Bet Baccarat* to win \$100,000! This book gives you definite steps and procedures for two different speeds of baccarat games – games played at 60 hands per hour and games played at 250 hands per hour.

Your actual performance may vary from this plan. If you switch back and forth from online play to playing in brick and mortar casinos you will have different hourly win rates than the ones we have shown.

You may also encounter some unexpected losses that reduce your win rate. If this happens, just continue to follow the plan. Let's assume that you are playing in land-based games and have built your bankroll up to the \$3,500 level and starting playing with \$100 base bets. Unfortunately you hit a bad streak and lose two out of six games and your bankroll is reduced to \$2,500, slightly below the amount needed to play with \$75 base bets.

The best way to handle this is to reduce your betting to the level of base bets supported by your bankroll of betting with \$75 base bets. As you rebuild your winnings you can move back up to making \$100 base bets.

In the next chapter we take a look at the kind of weekly and yearly winnings you can expect once you grow your bankroll. We think that you will be impressed.

Setting Up Your Permanent Income Stream

In this chapter we will take a look at what you can expect playing at 60 rounds per hour as well as 250 rounds per hour games.

Your Winnings Playing in 60 Spin Per Hour Baccarat Games

As a \$5 base bettor you can expect to average making about \$31 an hour playing in a baccarat game averaging 60 rounds per hour.

If you play at this level ten hours a week, you will average winning about \$310 a week. With 15 hours a play, your winnings will average about \$465 a week and if you play 20 hours a week, your weekly income will hit about \$620 a week. If you play 50 weeks a year at this level, your yearly baccarat income will be about \$31,000 a year.

The table below summarizes weekly winnings played in 60-round per hour games for play at \$5, \$10, \$15, \$20, \$25, \$50, \$100, \$200 and \$500 base bets.

Weekly Winnings Compared by Time Played and Level of Play –60 Hands per Hour Game Speed

<i>Base Bet</i>	<i>\$5</i>	<i>\$10</i>	<i>\$15</i>	<i>\$20</i>	<i>\$25</i>	<i>\$50</i>	<i>\$100</i>	<i>\$200</i>	<i>\$500</i>
<i>Average</i>	\$31	\$62	\$93	\$124	\$155	\$309	\$619	\$1238	\$3096
<i>Hourly Win Rate</i>									
<i>Weekly Winnings</i>									
<i>10 hrs</i>	310	620	930	1240	1550	3090	6190	12380	30960
<i>15 hrs</i>	465	930	1395	1860	2335	4635	9285	18570	46440
<i>20 hrs</i>	620	1240	1860	2480	3100	6180	12380	24760	61920

We will touch on several levels of play –

As a \$15 base bettor your winnings will average \$93 an hour. At this level, ten hours a week of play will net you an average of \$930. Twenty hours a week will bring in \$1860. If you played 50 weeks a year at this level you would bring in \$93,000 a year.

Your Winnings Playing in 250-Hand Per Hour Baccarat Games

As a \$5 base bettor you can expect to average making about \$129 an hour playing in a baccarat game averaging 250 hands per hour.

If you play at this level ten hours a week, you will average winning about \$1,290 a week. With 15 hours a play, your winnings will average about \$1,935 a week and if you play 20 hours a week, your weekly income will hit about \$2,580 a week. If you play 50 weeks a year at this level, your yearly baccarat income will be about \$129,000 a year.

The table below summarizes weekly winnings played in 250-hand per hour games for play at \$5, \$10, \$15, \$20, \$25, \$35, \$50, \$100 and \$200 base bets.

Weekly Winning Based on Time Played and Level of Play Online Games 250 rounds per hour

<i>Base Bet</i>	\$5	\$10	\$15	\$20	\$25	\$35	\$50	\$100	\$200
<i>Average</i>	\$129	\$258	\$387	\$516	\$645	\$903	\$1290	\$2580	\$5160
<i>Hourly Win Rate</i>									
<i>Weekly Winnings</i>									
<i>10 hrs</i>	1290	2580	3870	5160	6450	9030	12900	25800	51600
<i>15 hrs</i>	1935	3870	5805	7740	9675	13545	19350	38700	77400
<i>20 hrs</i>	2580	5160	7740	10320	12900	18060	25800	51600	103200

Let's review a couple levels of play at 250 hands per hour.

As a \$10 base bettor your will average winning \$258 hour. Ten hours a week of play will bring you \$2580 a week. Move up to playing 20 hours a week and you can bring in a cool \$5,160 plus a week. Play 50 weeks a year at this level and you can bring in \$258,000 a year.

As a \$25 base bettor your winnings can really soar. With a win rate of \$645 an hour, 10 hours a week will bring in \$6,450a week. Play 20 hours and your weekly net reaches an

eye-popping \$12,900 a week. Ready for the big time? Play 50 weeks a year at this level and you will make \$645,000 a year.

To play online using minimum bets of \$100 to \$200 you will want to play in one of our recommended high stakes baccarat casinos.

Summary and Conclusion

Six-Bet Baccarat is an very consistent performer. All of the amounts and assumptions used in this book were based on the results of actual play. That is why we have a high level of confidence in this plan to build your own \$100,000 bankroll.

If you decide to use this plan, please feel free to modify to match your personal needs and style of play. If you just stick with the basics of controlling your losses and not moving up to a higher playing level until you have the required bankroll you should do fine.

I wish you the best of luck in growing your own \$100,000 bankroll!
