Introduction

Before you read this manual you should read the Tracker Roulette manual and learn how to use the Tracker Roulette Strategy.

The Tracker Roulette Strategy is designed for the even-money bets at roulette. You will wager on the colors – red and black, the numbers high and low or on odd and even. We prefer to bet on red and black.

Tracker Roulette is the easiest way to win large amounts off of a small bankroll. This manual shows how you can easily turn $30 into $50,000 playing roulette online. In addition you'll discover how to turn $150 into $50,000 in land-based play.

If you would like to win $50,000 in just 14 hours this is the plan you need. This is the same plan our players have used with great success to win $50,000 or more their first week as Tracker Roulette players!

With the information in Tables 1 and 2 we can start developing your options for winning $50,000 your first week as a Tracker Roulette player!

Hourly Winnings

One of the best features about Tracker Roulette is its predictability. While anything can happen over the next spins of roulette, as you play longer using the strategy, the results become more and more predictable.

After playing thousands of games in casinos we determined that the hourly winnings were pretty much dependent on:

      a. **The speed of the game and**
      b. **The size of your bets.**

So long as you apply the strategy correctly, your hourly wins will fall within a narrow average.

Assuming an average table speed of about 60 hands per hour in a land-based game and 350 hands per hour playing online, the amount you can win per hour is strictly dependent on the size of your bets, which is determined by your bankroll.

This is very straightforward and simply means that if you play with black $100 chips, you should expect to win more than a player betting with green $25 chips. Likewise, the green chip player will average winning more than the red $5 chip player.

Table 1 shows the relationship between hourly winnings and the level of bankroll used at a table averaging 60 hands per hour for land-based play and 350 hands per hour for online play. **These illustrations are based on the actual results obtained in hundreds of games played in real casinos**. While this table, as well as the ones which follow, show the amounts you can win over different time periods with different amounts "invested" in each game, **there is nothing hypothetical about these winning rates. These amounts are based on actual casino games.**

The next chapter covers the plan to turn $150 into $50,000 playing in a land-based casino.

♣♥♠♦

Starting Small to Win Big – Playing Roulette in a Land-Based Casino

One of the strongest benefits of learning Tracker Roulette is that you can use winnings from the casino to build your bankroll very quickly.   Anyone who can raise just a few hundred dollars can get started using this strategy to build a respectable gambling bankroll.

Starting with $5 Base Bets, Table 2 shows the hourly win rates for land-based play.

Table 3.
Hourly Winnings for Games Played at Rate of
60 Rounds per Hour
at Different Bet Levels

Minimum Bet	Game Bankroll	Total Bankroll	Average Won Per Spin	Land-based Hourly Winnings (60 spins per hour)
$1	$30	$150	0.555	$33.30
$2	$60	$300	1.111	$66.60
$3	$90	$450	1.666	$99.60
$5	$150	$750	2.777	$166.62
$10	$300	$1500	5.554	$333.24
$15	$450	$2250	8.331	$499.86
$20	$600	$3000	11.108	$666.48
$25	$750	$3750	13.885	$833.10
$35	$1050	$5250	19.439	$1166.34
$50	$1500	$7500	27.764	$1665.84
$75	$2250	$11250	41.646	$2498.76
$100	$3000	$15000	55.528	$3331.68
$200	$6000	$30000	111.056	$6663.36
$300	$9000	$45000	166.584	$9995.04
$400	$12000	$60000	222.112	$13326.72
$500	$15000	$75000	277.64	$16658.40

Our objective is to win $50,000 in the shortest time possible. We will start out with $150, the amount needed for theGame Bankroll for $5 bets.

I am going to assume that you would rather "grow" you own bankroll out of your roulette winnings.

Table 3 recaps bankroll levels for $5 to $500 Base Bettors.

Table 4 shows a plan whereby you can start out as a $5 bettor and win $50,000 by increasing the size of your bets as your winnings grow.

Table 4. $50,000 Bankroll Growth Plan for Land-based Play

Base Bet	Bankroll for this Level of Play	Bankroll Needed to Next Higher Level of Play	Winnings Needed to Play at Next Level	Hourly Win Rate for Level of Play	Hours of Play Required to Reach Next Level of Play	Bankroll at End of Play
5	$150*	$1500	$1350	$166.62	8.1 hrs	$1500
10	$1500	$2250	$750	$333.24	2.3 hrs	$2250
15	$2250	$3000	$750	$499.86	1.5 hrs	$3000
20	$3000	$3750	$750	$666.48	1.1 hrs	$3750
25	$3750	$5250	$1500	$833.10	1.8 hrs	$5250
35	$5250	$7500	$2250	$1166.34	1.4 hrs	$7500
50	$7500	$11250	$3750	$1665.84	2.25 hrs	$11250
75	$11250	$15000	$3750	$2498.76	1.5 hrs	$15000
100	$15000	$50,000	$35,000	$3331.68	10.5 hrs	$50,000
Time Required to Win $50,000					30.45 hrs Rounded = 31 Hours	

* We start with the Game Bankroll needed for $5 play. From $10 base betting on we assume that you need to have the Total Bankroll amounts

Here are the assumptions behind the Bankroll Growth Plan shown in Table 4.

1. Your objective is to grow a bankroll to $50,000 increasing the size of your bets as your bankroll grows enough to support the next higher level of play.

2. You will start out as a $5 bettor using a $150 bankroll. This is the amount needed for the Game Bankroll. However, the plan requires the amount of the Total Bankroll for higher levels of bets.

3. You will play roulette at each level until you have won enough to qualify you to play at the next higher level shown in the table.

Here is how the table is set up:

Base Bets – Your minimum bet at each level of play.

Bankroll for this Level of Play – The total bankroll you need for each level of play. For example, the Game Bankroll needed for $5 betting is $150.

Bankroll Needed to Play at Next Higher Level of Play – This is the next level you want to reach at each level of play. As a $5 bettor, starting with $150, you want to build your bankroll to $1500, the Total Bankroll needed to make $10 bets.

Winnings Need to Play at Next Level – This is your dollar win goal at each level of play. For example, starting as a $5 bettor, your win goal is $1350, the amount needed to increase your bankroll from $150 to $1500. This is the Total Bankroll needed to make $10 Base Bets.

Hourly Win Rate for Level of Play – Each level of play has it own hourly win rate. As a $5 bettor, playing at 60 spins per hour, your average net win rate will be $166.62 per hour. This is the amount shown for $5 bettors in the row for $5 betting.

Hours of Play Required to Reach the Next Level of Play – Here we calculate how long it will take you, on the average, to win enough to move up one level of play. As a $5 bettor, it will take you 8.1 hours of play to win enough to grow your bankroll from $150 to $1500 and be qualified to move up to making $10 Base Bets.

As you can see, you will progress through each level of play until you meet the objective of winning enough to qualify to play at the next higher level.

It will take 8.1 hours to move from making $5 bets up to $10 betting.

As a $10 bettor put in 2.3 hours of play and you will be qualified to make $15 bets.

Another 1.5 hours of pay will take you from $15 to $20 betting.

Play another 1.1 hours and you'll move up from $20 to $25 betting.

The next move is a little larger as you will jump from making $25 to $35 bets. . As shown in the table, it will take you 1.8 hours to reach the $35 betting level.

From $35 betting to $50 betting takes another 1.4 hours of play. After bringing your bankroll up to $11,250 you will move up to making $75 bets and winning $2499 an hour.

The final step is make $100 base bets. Most casinos will accommodate this level of play and it is not unusual to encounter $100 bettors. As a $100 bettor you will win $35,000 in less than 11 hours and bring your bankroll up to $50,000!

Having adequate bankroll is critical to the success of this plan. If you have trouble raising enough to qualify for $5 betting you should consider starting out planning online and winning enough to make $5 bets in a land-base casinos.

However, you always want to make sure that you aren't playing with the rent money or other money you need for essentials. I call this money "scared money" because you absolutely cannot afford even a single loss with this money.

Can you guess what happens when you play with scared money? You don't play correctly because you are afraid to lose. If you are afraid to lose, you will end up doing strange things like losing more than you should.

With scared money on the line, you will be afraid to take a loss, because you really can't afford to lose any of the money. So your behavior changes. When you have a losing game, you will be reluctant to take your lumps and pull off the table with a loss. You may pull more money out and continue playing, because to quit playing would entail recognizing that you had lost money you couldn't afford to lose.

Once you fall into this trap, your discipline will rapidly disappear and you will find yourself chasing losses. That's one of the things having an adequate bankroll of money especially set aside for gambling will help you overcome. **Having a "risk bankroll" is designed to protect you from losing control when you gamble.**

Growing Your Bankroll Playing Online

In the previous chapter we presented a plan to win $50,000 starting with a $150 bankroll making $5 bets. In the plan for land-based play we move from making $5 base bets to $100 base bets to complete the win plan.

The main differences between using Tracker Roulette in land-based versus an online game are:

1. You can play with lower betting limits online. For example most online casinos accept 25¢ to $0.50 minimum bets while these games have virtually disappeared in land-based casinos.

2. Since online games are much faster then land-based games, your hourly win rate will be higher in an online game since you will play more hands to hour. In this book we assume speeds of 60 spins per hour for land-based games and 350 spins per hour for online play.

Table 5 below shows the hourly win rates
Starting with $25 Cent Base Bets, Table 5 shows the hourly win rates for online play.

Table 5.
Expected Hourly Win Rate
If Played at Rate of 350 Rounds per Hour
at Different Bet Levels

Minimum Bet	Game Bankroll	Total Bankroll	Online Hourly Winnings (350 Spins per hour)
25¢	$7.50	$37.50	$48.56
50¢	$15	$75	$97.13
$1	$30	$150	$194.39
$2	$60	$300	$388.78
$3	$90	$450	$583.14
$5	$150	$750	$971.95
$10	$300	$1500	$1943.90
$15	$450	$2250	$2915.85
$20	$600	$3000	$3887.80
$25	$750	$3750	$4859.75

Our objective is to win $50,000. We'll do it by increasing the size of our bets as our bankroll grow enough to support the next higher level of bets.

Table 6. shows a plan whereby you can start out as a $1 bettor and literally grow your own bankroll.

Table 6. Bankroll Growth Plan for Online Play

Base Bet	Bankroll Needed for this Level of Play	Winnings Needed to Reach the Next Base Bet Level	Average Hourly Winnings at 350 Spins per Hour	Hours Needed to Win Additional Bankroll for Next Level	Bankroll After Play
$1	$30	$270	$194	1.4 hrs	$300
$2	$300	$150	$388	0.4 hrs	$450
$3	$450	$300	$583	0.5 hrs	$750
$5	$750	$750	$972	0.8 hrs	$1500
$10	$1500	$750	$1943	0.4 hrs	$2250
$15	$2250	$750	$2925	0.25 hrs	$3000
$20	$3000	$750	$3887	0.2 hrs	$3750
$25	$3750	$46250	$4860	9.6 hrs	$50,000
Total Hours to Reach $50,000				13.55 hrs (rounded to **14 hours**)	

* We start with the Game Bankroll needed for $1 play. From $2 base betting on we assume that you need to have the Total Bankroll amounts

Here are the assumptions behind the Bankroll Growth Plan shown in Table 6.

1. Your objective is to grow a bankroll larger enough to make $25 base bets, which requires a total bankroll of $3,750. Once at this level you will continue to play until your bankroll grows to $50,000.

2. You will start out as a $1 bettor using a $30 Game Bankroll. This is the amount needed for the Game Bankroll. However, the plan requires the amount of the Total Bankroll for higher levels of bets.

3. You will play roulette at each level until you have won enough to qualify you to play at the next higher level shown in the table.

Here is how the table is set up:

Base Bets – Your minimum bet at each level of play.

Bankroll for this Level of Play – The total bankroll you need for each level of play.

Bankroll Needed to Play at Next Higher Level of Play – This is the next level you want to reach at each level of play. As a $1 bettor, starting with $30, your first goal is to build your bankroll to $300 which qualifies you to make $2 base bets.

Winnings Need to Play at Next Level – This is your dollar win goal at each level of play. For example, starting as a $1 bettor, your win goal is $270, the amount needed to increase your bankroll from $30 to $300. The next level of bankroll of $450 is the amount needed to make $3 Base Bets.

Hourly Win Rate for Level of Play – Each level of play has it own hourly win rate. As a $1 bettor, playing at the rate of 350 bets per hour, your average net win rate is $194 per hour. This is the amount shown for $1 bettors in the row for $1 betting.

Hours of Play Required to Reach the Next Level of Play – Here we calculate how long it will take you, on the average, to win enough to move up one level of play. As a $1 bettor, it will take you 1.4 hours of play to win enough to grow your bankroll from $30 to $300 and be qualified to move up to making $2 Base Bets.

As you can see, you will progress through each level of play until you meet the objective of winning enough to qualify to play at the next higher level.

It will take you 1.4 hours to move up from $1 bets to making $2 bets.

Another 0.4 hours of play will move you up to making $3 bets.

It will take 0.5 hours to move from making $3 bets up to $5 betting.

Play 0.8 hours more and you will move from $5 to $10 betting.

Play another 0.4 hours and you will be qualified to make $15 bets.

As a $15 bettor you'll win enough to make $20 bets in just 0.25 hours.

You'll move from $20 bet to $25 betting in another 0.2 hours.

Finally as a $25 bettor it will take you just 9.6 hours to reach your objective of winning $50,000!

Having adequate bankroll is critical to the success of this plan. To win $50,000 just take it one step at a time!

Summary of Our *Build Your Own Bankroll* Plans

We have presented two different approaches to winning $50,000 playing roulette.

These plans assume that you use Tracker Roulette. Each of our plans are proven to work, using win rates derived from 5,313 games played and documented.

Plan One assumes that you play in land-based casinos. Table 4 summarizes this plan in which it will take you just 31 hours to turn a $150 bankroll into a $50,000 bankroll.

Plan Two assumes that you play online only. Table 6 summarizes this plan. Here it will take about fourteen hours to grow your bankroll from $30 to $50,000.

Which way you go is up to you. However, each of these plans has worked for other players and will work for you, too!

♣♥♠♦

Rules to Help You Keep Your Winnings

There is no question that if you follow this plan you can win $50,000 playing roulette. Does this mean you can relax? Unfortunately no. Even though there is no question that you will win using this system of play, there is still the issue of leaving the casino with your profits in hand.

One of our most important rules to help you leave a winner is the 90% Rule. This rule says very simply that if you are close to hitting a target profit or a daily profit, that sometimes 90% or so is close enough.

I recall very well an acquaintance of mine who had a monster roll at a craps table. When I walked up to the table, Joe was rolling the dice and playing with $500 chips scattered all over the layout. By the time he sevened out, he was up over $48,000. This is not bad considering he bought in less than an hour earlier for a grand. I strongly urged him to come with me and take a break. I reminded him how badly he needed this score and how good he would feel walking out with his winnings intact. He nodded and smiled and then gave some lame excuse about wanting to bet with just a couple more shooters.

I had more than made my nut for that day. In fact, catching the last ten minutes of his hot craps roll had put me way ahead.   I decided to take a break in the coffee shop and try some of the coconut cream pie which was reputed to be the best in town.

I ran into another friend and talked for over an hour. When I came back out, Joe was still at the same table. I walked up and noticed his pitiful little pile of green chips. Joe gave me a lame look and continued to play. I saw him the next day and asked him how he ended up. "Tapped out," were his words. "You didn't drop the whole 50 grand did you?" I asked.

"It was only 48 thousand," he responded. "The reason I kept playing is because I wanted to hit 50 thousand."

As I walked away, I wondered to myself what in the hell is the difference between 48 thousand and 50 thousand when you are that much ahead?

I think 48 thousand should have been close enough, don't you?

Any time you are struggling to hit a target profit, are playing on a short time schedule or just start to hear that little nagging voice somewhere in the back of your skull telling you to watch out, you can remember Joe. He should have known that 48 grand was close enough. Don't ever get hung up on exact amounts. If you are trying to win $50 and hit $48, you can call it close enough and take a break. Remember that you will never go broke by taking a break early and walking off with your profits intact.

♣♥♠♦

Living a Life of Ease

When you go to the casino, you need to remember that your one purpose is to win. You can drink, party, visit, flirt and relax on your own time after you have locked up your daily win. After becoming a proficient Tracker Roulette player and increasing the size of your minimum wagers, you will be able to travel a good part of the year, courtesy of your favorite casinos. This may become an important part of your retirement plan. You can use your new skills at roulette to pay for your vacations and pocket a good deal of change as well.

You may consider becoming a full time pro. Before you make this step, I want you to think about it very carefully. Whereas playing several times a month and winning can bring you a great deal of pleasure, having to play every day to make your daily nut is very difficult.

Casinos can be glamorous and exciting if you don't have to be in one every day. On a daily basis, I can think of many things I had rather do than go through the repetitive grind of play needed to hit my daily win goal. Everyone is different. If you think you would like to turn pro, I suggest you take a two week vacation and spend at least ten of the days in a casino playing blackjack four hours a day. If, after two weeks of this, you are still game for more, then maybe you have what it takes to become a full time player. If you are like me, you may have to settle for being a part time pro and playing less frequently.

I hope you find Tracker Roulette to be a lifetime source of income and satisfaction. I would like to hear about your experiences. You may write me in care of the publisher. I wish you the best in all of your life endeavors.
